

Our international network

PROCOS Group can call on the experience and expertise of its teams throughout Europe. The offices exchange know-how and experience. This allows us to provide state of the art solutions to our clients.

PROCOS Group is a corporate member of EuroFM, participates in the network activities and leads the EuroFM market data project. PROCOS Group is also a member of Corenet Benelux, has individual memberships of IFMA, bringFM!, PAFM, VIK, KVIV (Engineering association) and participates in the CEN working group on area measurement. PROCOS Portugal is a founding member of APFM, the Portuguese FM association and correspondent to the Portuguese Quality Institute.

Our clients

PROCOS Group's clients are public and private sector organizations in European countries. They are active in industry, government, banking and insurance, professional services and energy, all with large and diverse portfolios. Some of the most recent projects are:

- Flemish government (Belgium) : implementation of Fleet Management.
- Turk Telekom (with ASC Romania and Innova): broad implementation of ARCHIBUS for the privatized Turkish phone company. Multiple applications were made available for the entire organization
- Philips Portugal : New Headquarters' Space planning, Test Fit, Interior Design, Project Management
- Hospital Distrital de Santarém (Portugal): Upgrade from ARCHIBUS V.14, implementation of Web Central Asset and Building Operations Management.

Our work with ARCHIBUS

For more than 15 years, the teams of PROCOS Group have been implementing ARCHIBUS in complex projects and several disciplines: space management, building inventory, asset management, work on demand, preventive maintenance, etc. reaching projects' payback periods as low as 3 months.

By combining the competences of PROCOS' consultants with the expertise and know-how of its software team, PROCOS Group can offer a unique set of services to its clients:

- Consultancy in Space and Area Management
- Integration of ARCHIBUS with corporate systems (SAP, Oracle Financials, PeopleSoft, Building Management Systems...)
- Development of web applications and dashboards
- Mobile applications
- Integration of REVIT with ARCHIBUS - integrated design

PROCOS Group's helpdesk supports its clients in their daily operations.

Our Services & Tools

PROCOS Group is an international network of consultants in Facility Management and Facilities Planning.

PROCOS Group provides a full range of services throughout the entire life-cycle of a building or of a real estate portfolio, from consultancy on a strategic level to the implementation of operational systems.

Facilities Planning

Facilities planning is more often than not influenced by the existing building and work environment. The continuous validation of the harmonious integration of the fit out is of fundamental importance not only strategically but also during the execution.

The building and the work environment are an integral part of the organisation. Their function is to support the vision and the strategy of the company in all aspects so that the employees can concentrate on their own tasks. Moreover, PROCOS Group's services delivered savings of up to 35% of space needs while increasing the workplace quality, collaboration and productive working environment, in projects managed to meet the agreed deadlines, and according to the budget.

Facilities Management

In order to advise and support PROCOS Group's clients in the management of their facilities, first there is the need to understand the role of the facilities services within the organisation. This often leads PROCOS' consultants to analyse the process and to suggest solutions.

The use of information technologies has become mandatory to achieve efficient FM processes. To provide value for its clients, PROCOS offices provide and implement ARCHIBUS as well as owned information management systems, tools which are used to support the organisation at strategical, tactical and operational levels.

PROCOS Group information tools, Collaborators' competences and skills in Architecture, Engineering, Facilities Management, and IT Expertise guarantees the delivery of top-quality services and products to deal with buildings' requirements throughout their whole life cycle.
